

Summary

Weights in the Norwegian national travel survey

TØI Report 1548/2017

Author: Fredrik Alexander Gregersen

Oslo 2017 14 pages Norwegian language

The Norwegian national travel survey do apply weights to get unbiased estimates. This report presents a short overview over the weights applied in the surveys.

The Norwegian national travel survey has been conducted in 1985, 1992, 1998, 2001, 2005, 2009 and 2013/14. Each time apart from 1985 the results are presented with weights. How the weights have been estimated have varied substantially over time. This report presents a short overview over the weights for each year.
