

How to govern smart mobility? Experiences to date and future directions

Claus Hedegaard Sørensen

Smart mobility as policy field

The policy field of smart mobility is in its infancy, and...

...governance approaches are not well developed.

Often public actors are unprepared

Who are actually ruling?

Policy instruments...

..are the tools to govern.

Policy instruments are defined broadly.

Focus in this presentation is on approaches to governing of and with smart mobility.

Which implies the use of a variety of policy instruments.

Which policy instruments are applied?

Substantive policy instruments

Processual policy instrument

Policy instruments help to understand the field, establish relations, and making it governable.

We will see more substantive policy instruments in the future

Suggestions for decision-
makers and civil servants

1

Basic values must
be ensured

2

Everyone benefits
from a clear
framework

3

Real progress
requires
collaboration

4

Citizens are more
than just customers

5

Systematic
learning is
important

6

Today's policy
instruments
remain relevant

7

Brand new
instruments establish
changed conditions

Corona and smart mobility

Do politicians and authorities dare to rule?

The experiences from corona show that when it is needed they possess the necessary will, courage and policy instruments
